

Northstone Eave Ventilation System Fixing Guide

Ventilation Eave Ventilation

The Roadstone Eave Ventilation System provides continuous over-fascia roof space ventilation in a simple weatherproof system. This system eliminates the need for a tilting fillet and reduces the required height of the fascia board.

Key features and benefits

- No need for timber tilting fillet.
- Prevents insulating materials blocking under-fascia vent grilles.
- Suitable for use with or without over-hanging soffit.
- Effective ventilation area 10,000 sq. mm. per meter run of eaves or 25,000 sq. mm per meter.
- Complies with requirements of Irish Building regulations for roof space ventilation.
- Available with increased ventilation area equivalent to 25mm per linear meter.
- Compatible for use with all Roadstone tile profiles.
