With over 60 years in the sand industry, Northstone Materials Limited is your trusted partner in extracting, processing, and supplying graded, classified sports sands throughout Northern Ireland. Our sand, sourced from Lough Neagh, is washed to remove silt and classified to achieve a clean, fine grade.

At Northstone Materials Limited, we recognise that every sports ground has a unique purpose. We take pride in offering a diverse range of sand options, allowing you to make the best choice for your needs. Our top-dressing sand is used to top-dress all winter sports pitches, golf courses and more. Top dressing sand can also be mixed with organic materials like screened soil to create a mix that can be applied to the turf's surface. Choose from our Lough Sand or our Pit Sands from the Sperrins to find the perfect match for your sports facility.

## TESTIMONIALS

***"I have used Northstone Materials for years to top dress winter games pitches throughout Northern Ireland. Their quality, service and sales support must be the best in the country."***

Alan Irwin, Partner  
Irwin Groundworks, Ballymoney

***"We have used Northstone Materials to supply new and existing pitches with quality washed sands over the years. We built Moneyglass's new grass GAA pitch, and their Hutchinson's site in Toomebridge supplied the sand, and the quality of Lough Neagh Sand is second to none."***

Liam Haslem, Director  
Tony Patterson Sports Grounds, Ballynahinch

***"Northstone Materials have been supplying Sports sand to Fortwilliam Golf Club for years. We have used their Dungiven sand for Fairways, it is a good gritty sand that helps with drainage and firming up the playing surfaces. We use the Lough Neagh sand for tee boxes as it is a well-washed graded sand."***

Jason Podris, Course Manager  
Fortwilliam Golf Club, Belfast
