

Northfast Dry Ridge and Hip Kit 6m

Description

Northfast Multi Dry Fix Ridge and Hip Kit is a universal dry ridge and hip system complying to BS5534 and for ventilating to comply to BS5250 (effective 5000 mm²/1m) suitable for most concrete and clay ridge and hip tiles.

It comes in a practical all-in-one kit, including:

- 1 x Ridge and Hip Roll;
- 13 x Ridge to ridge seals
- 13 x Stainless steel screws and washers (100 mm)
- 13 x Clamping plates
- 10 x Ridge batten strips to comply to BS8612

Guidelines for use

Northfast Ridge and Hip should be installed as per the Fixing Instructions. If used on a hip with single lap interlocking tiles we recommend that the Hip Tray is installed to ensure a straight line and a Tile Clip is used to support cut tiles that can't be nail fixed. If the kit is being used for 300mm Ridge fittings then additional Unions and fixings are required.

Specifications

Weight	2090 gms
Packed in	6m per carton
Material Polypropylene (PP)	Polypropylene (PP)
Manufacturing process	Injection moulding
