

GRP Over Batten Dry Valley System

GRP Over Batten Dry Valley is a mortarless system, which provides a maintenance free means of discharging water from the roof, which is suitable for use with slates, interlocking and profiled roof tiles. The system is supplied in 3m lengths (Fig. 1). It is finished in a standard lead grey colour.

The system creates a close-cut appearance on new builds and refurbished properties where fixing times can be reduced up to 50% over traditional methods.

Eaves Closures and Top Closures

Eave closures and top closures are precision-engineered junction components for the top and bottom of the valley, designed to minimise installation variability and ensure a flawless, high-quality finish.

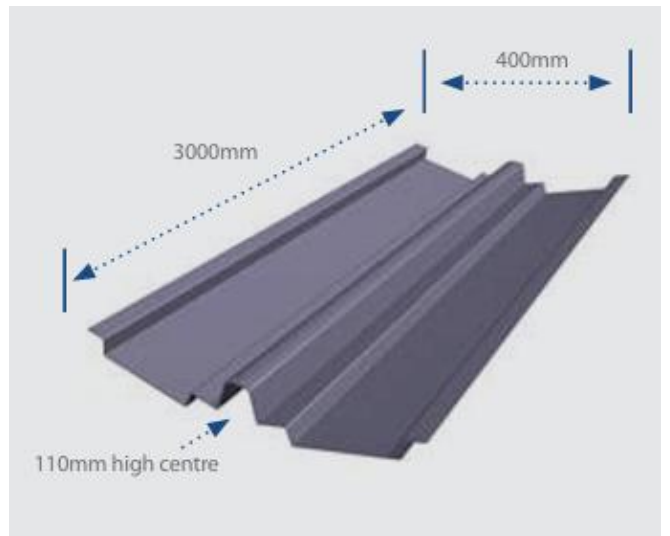

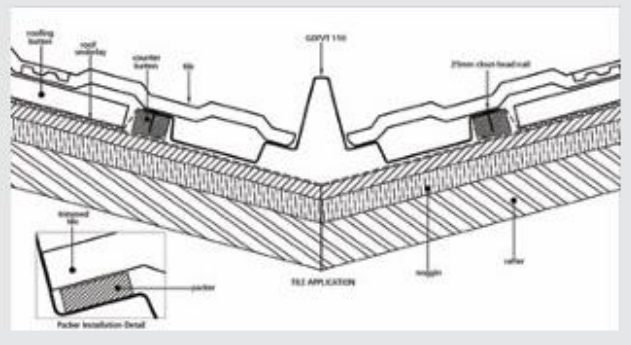

Fig.1

Over batten Dry Valley

Profile	Over Batten Fixing
Size	3000mm Long x 400mm
Material	UV Glass Fibre/Polyester Laminate
Benefits	Improved Drainage. No Mortar. Improved Appearance. Time saving. No Scrap Value
